EDUCATION

Noida Institute of Engineering and Technology <i>Bachelor of Technology in Artificial Intelligence; CGPA: 8.0</i>	Greater Noida, Uttar Pradesh, India 2021 – 2025
Bal Vidhyalaya Madhyamik School <i>Senior Secondary (12th Grade)</i>	Varanasi, Uttar Pradesh, India 2020 – 2021
Bal Vidhyalaya Madhyamik School <i>Secondary (10th Grade)</i>	Varanasi, Uttar Pradesh, India 2018 – 2019

EXPERIENCE

Software Engineer <i>Ethara AI</i>	February 2025 – Present <i>Gurugram, Haryana</i>
- Collaborated on building AI-driven web applications focused on education and interactive content delivery. - Developed backend APIs and integrated them with React-based frontends using Python and Flask. - Worked on optimizing inference pipelines for natural language models to improve response time by 35%. - Implemented authentication, session handling, and secure deployment practices across multiple microservices.	
Data Analyst Intern <i>Sorbitol Technologies Pvt. Ltd.</i>	June 2024 – August 2024 <i>Noida, Uttar Pradesh</i>
- Analyzed large datasets to uncover trends and actionable insights. - Created data visualizations and reports to communicate findings to key stakeholders. - Assisted in data cleaning, preprocessing, and model evaluation tasks for improved prediction accuracy.	

PROJECTS

Movie Recommendation System <i>Python, Flask, NLP</i>
- Created a content-based movie recommendation system with 92% accuracy. - Achieved a 60% increase in user retention by delivering relevant recommendations.
Car Price Prediction Using Linear Regression <i>Python, NLP, Machine Learning</i>
- Achieved high accuracy by performing data preprocessing, feature engineering, and model fine-tuning with Scikit-Learn. - Built a complete ML pipeline from data cleaning to evaluation, significantly reducing prediction error.
Hospital Management System <i>Java, SQL, JDBC, Spring Boot</i>
- Created a console-based system to manage patient, doctor, and appointment information. - Implemented CRUD operations using JDBC with a MySQL backend, reducing data retrieval time by 20%.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL
Machine Learning: Scikit-Learn, Pandas, NumPy, Seaborn, Matplotlib
Web Development: Flask, React.js, HTML, CSS, JavaScript (Basics)
Databases: MySQL, MongoDB, SQLite
Developer Tools: VS Code, IntelliJ, Eclipse, Git
Concepts: Data Preprocessing, Model Evaluation, Web Scraping, REST APIs
Soft Skills: Team Collaboration, Leadership, Time Management, Technical Writing

CERTIFICATION

- **Naukri Campus Young Turks** — Scored 99.27 Percentile
- **Python Basics** — University Of Michigan
- **Introduction To Artificial Intelligence** — IBM
- **Machine Learning With Python** — IBM
- **Machine Learning For All** — University of London
